Desktop App + Browser Extension for Instagram & TikTok

# 1. Installing the Desktop App

1

## **Extract the ZIP file**

Unzip the VidGrab package you downloaded. You'll find VidGrab.exe and a folder called VidGrab-Extension.

2

## **Install FFmpeg**

Open PowerShell and run: `winget install ffmpeg`. This is required to merge audio and video.

3

## **Open VidGrab.exe**

Double-click the file. No installation needed — it runs directly. Windows SmartScreen may show a warning the first time; click "More info" then "Run anyway".

4

## **Paste a link and download**

Copy a video link from Instagram or TikTok, paste it into VidGrab, and click Download.

## 2. Installing the Browser Extension

1

### **Open your browser's extensions page**

Go to `chrome://extensions` (Chrome) or `edge://extensions` (Edge).

2

### **Enable Developer Mode**

Toggle "Developer mode" on, usually found in the top-right corner.

3

### **Load unpacked**

Click "Load unpacked" and select the VidGrab-Extension folder from the ZIP you extracted.

4

### **Browse & download**

With VidGrab.exe running, browse Instagram or TikTok. Click the extension icon to see every video detected on screen, with thumbnails — select the ones you want and send them to the app.

### 3. Activating Your Pro License

- 1 Open VidGrab**  
Launch the desktop app.
- 2 Click "Hazte Pro" / "Go Pro"**  
Found in the top-right corner of the main window.
- 3 Enter your license key**  
Paste the key you received by email after purchase (format: VIDGRAB-XXXX-XXXX-XXXX) and click Activate.
- 4 Enjoy unlimited downloads**  
Restart the app — the daily 5-download limit is now removed, permanently.
